

Welcome to ***GMCC 2009***

**Fourth International Conference on
Coexistence between Genetically Modified (GM) and
non-GM based Agricultural Supply Chains**

Melbourne, 10 – 12 November 2009

Venue

Melbourne Convention and Exhibition Centre

- Melbourne's new Convention Centre will be open in early 2009
- The integrated facility will be the most advanced convention and exhibition space in the Southern Hemisphere
- The new Centre will be one of the most architecturally impressive and environmentally sound buildings in Australia

GMCC-09 is the fourth edition of a biannual international scientific conference on coexistence between GM and non-GM agricultural supply chains.

GMCC-09 will gather the multidisciplinary scientific community involved in researching how agricultural supply chains can adapt to novel regulatory and market-driven coexistence requirements worldwide; with enhanced whole-of-supply chain and off-farm emphasis.

GMCC-09 will be highly relevant for industry, policy, agricultural biotechnology R&D and agribusiness communities.

***GMCC-09** represents the first conference in this series to take place outside of Europe*
