AGIC 2017

SE Asia (Feed) Wheat Demand and Growth

Indonesia, Thailand, Philippines & Bangladesh

3rd August 2017

Luke Mason

Total wheat demand overview – 25mmt.

Indonesia – 2nd largest import market globally

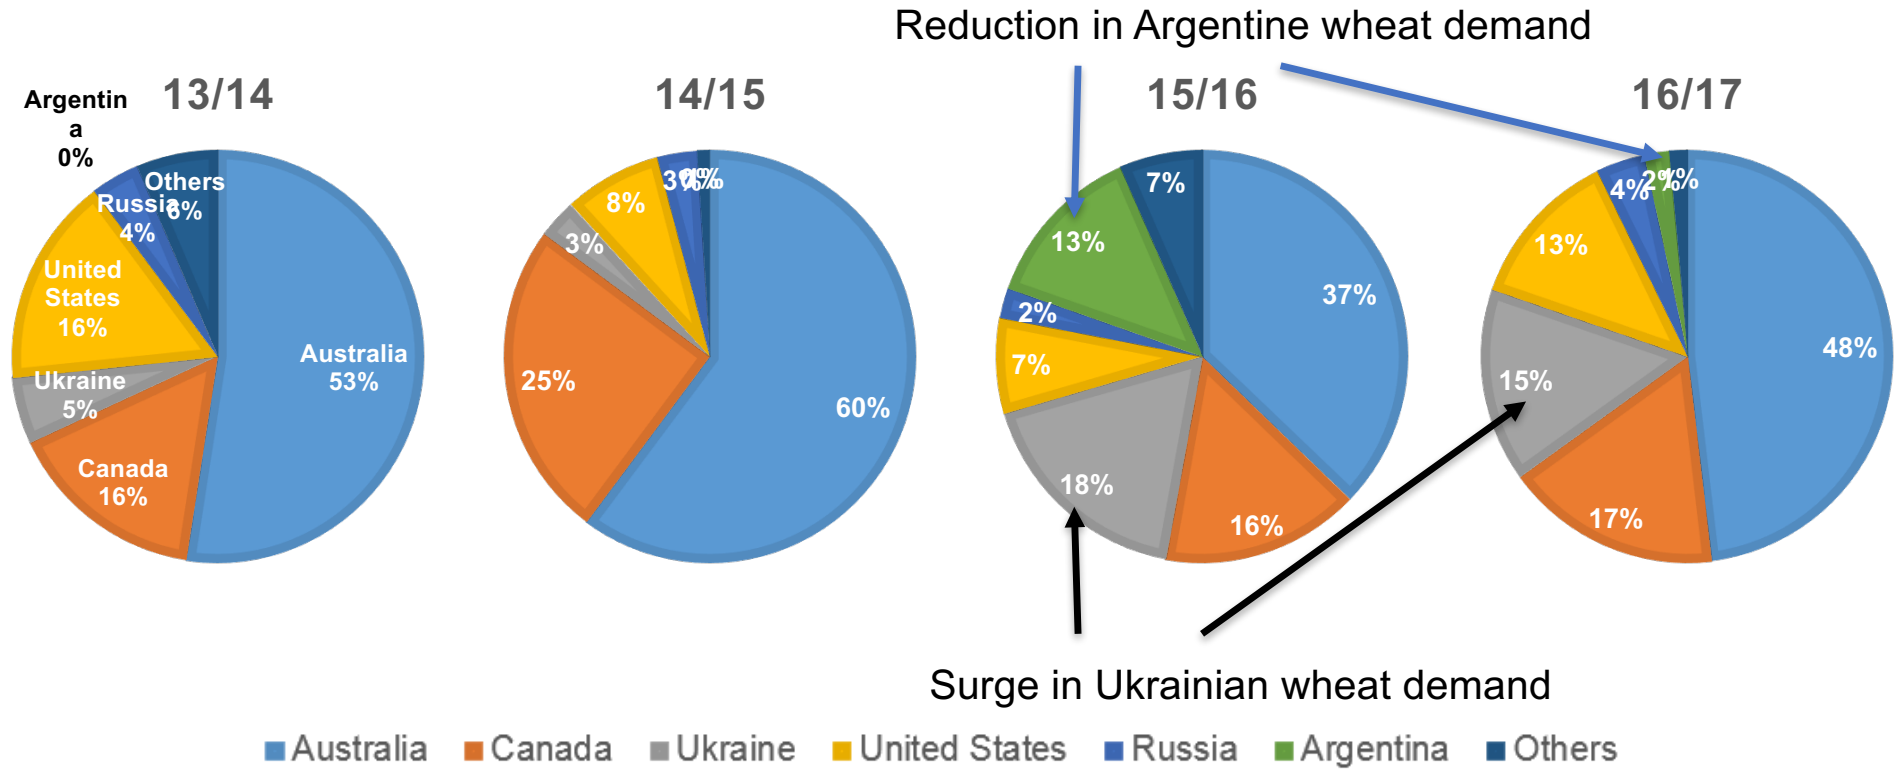

Indonesia – Corn Policy Aids Wheat Demand

- ❑ Corn policy change – banning of private imports in 2015
- ❑ Feed wheat imports surged in FH 2016 – local corn prices remain very high
- ❑ Subsequent feed wheat policy change in June 2016 – feed millers could not obtain licenses to import wheat
- ❑ ASW demand jumped FH 2017 with 11.5 Pro Blacksea to replace this programme in 2nd half of 2017

Indonesia – Ukraine share jumping

Philippines – Demand double over 4 years

Philippines

- ❑ Huge growth in ASW this year for feed purposes
- ❑ Cheap ASW price vs local corn prices
- ❑ Ongoing growth in feed consumption
- ❑ 7% tax advantage for Australia wheat vs other origins
- ❑ Corn import tax of 30% for non ASEAN origin severely limits access to global corn values

Philippines – Oz & Ukraine fuels the growth

Thailand – Rice & Corn Policy Causing Imports to slip

Thailand

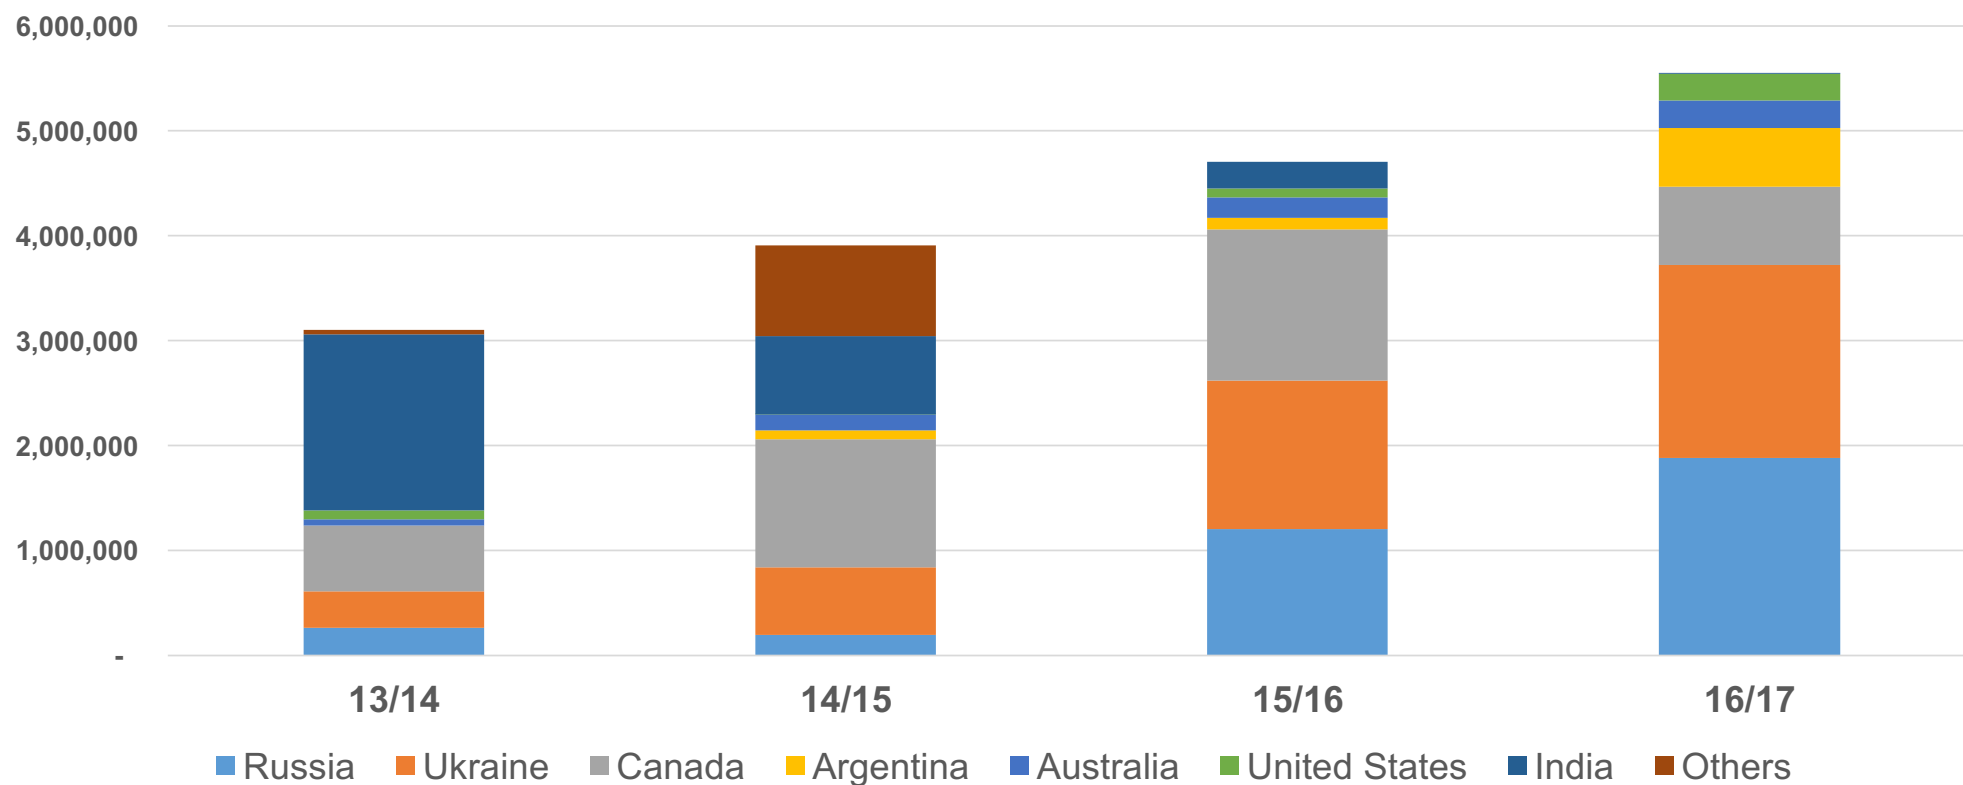

- ❑ Big growth in 14/15 & 15/16 mainly in Blacksea feed wheat
- ❑ Recent change in policy – Importers must buy 3 MT of local corn for every 1 MT of feed wheat imported. Implemented this year
- ❑ Government auctioning 3MMT of broken rice reserves as substitute to feed wheat. Feed mills must buy this as it can't be used for human consumption
- ❑ Local corn price is 235 USD/MT FOB
- ❑ Policy will continue to drive direction of import volumes (rice & corn)

Thailand

Bangladesh – Least cost buyer

Bangladesh

- ❑ Nearly double imports of 4 years ago
- ❑ Blacksea imports jumped in last 2 years
- ❑ High Indian prices led to less overland trade & more imports
- ❑ Indian Government MSP helps high prices vs imported wheat
- ❑ Large buyers of 10.5 DMB protein, 11.5 & 12.5 ex Blacksea

Bangladesh – Readily switches origins

Summary

- ❑ Circa 55% increase in imports to the 4 countries over 4 years
- ❑ Policy helps dictate feed wheat demand in Philippines, Thailand, Indonesia. That is largely protection of local corn farmers
- ❑ Indian wheat policy pushing Bangladesh to alternative sources. Overall demand also growing
- ❑ Future large ASW crops (as witnessed last year) will be readily met with this growing demand base
